## WHAT IS WRONG WITH THE CURRENT VIDEO EDITING OPTIONS ?

Pro editors are pure weekend stealers and deal with rocket science!!

Auto edit solutions lack human touch, emotions and creativity. The output is just professional looking and it is not fun and entertaining. The limited possibilities of style and output becomes repetative and loose novelty over time.

## WHY WILL THIS BE THE FUTURE OF VIDEO EDITING ?

### Entertaining vs Professional

Video indulgence can catch fire only if people have fun creating them and the videos turn out to be entertaining and not just professional looking.

### Sense of achievement

People get excited to show off their videos only if they have created them.

### Endless possibilities

Combinations of motion actions, visual & audio effects and background soundtracks provide endless possibilities for creating varieties of videos.

## NOW STOP EDITING & START GAMING !
