AuDimix

One track, limitless creativity

Get it from **Microsoft**
Supports Windows 11 & Windows 10

What is AuDimix?

AuDimix is a music track splitter app that allows you to split stems of any song to practice, perform, and create music. The app is powered by AI, and accurately separates the different stems from any song. This can be useful in a variety of scenarios such as needing sections of a song to practice an instrument to, removing vocals to create backing tracks, creating your own samples from a song to add to your mix, and so much more.
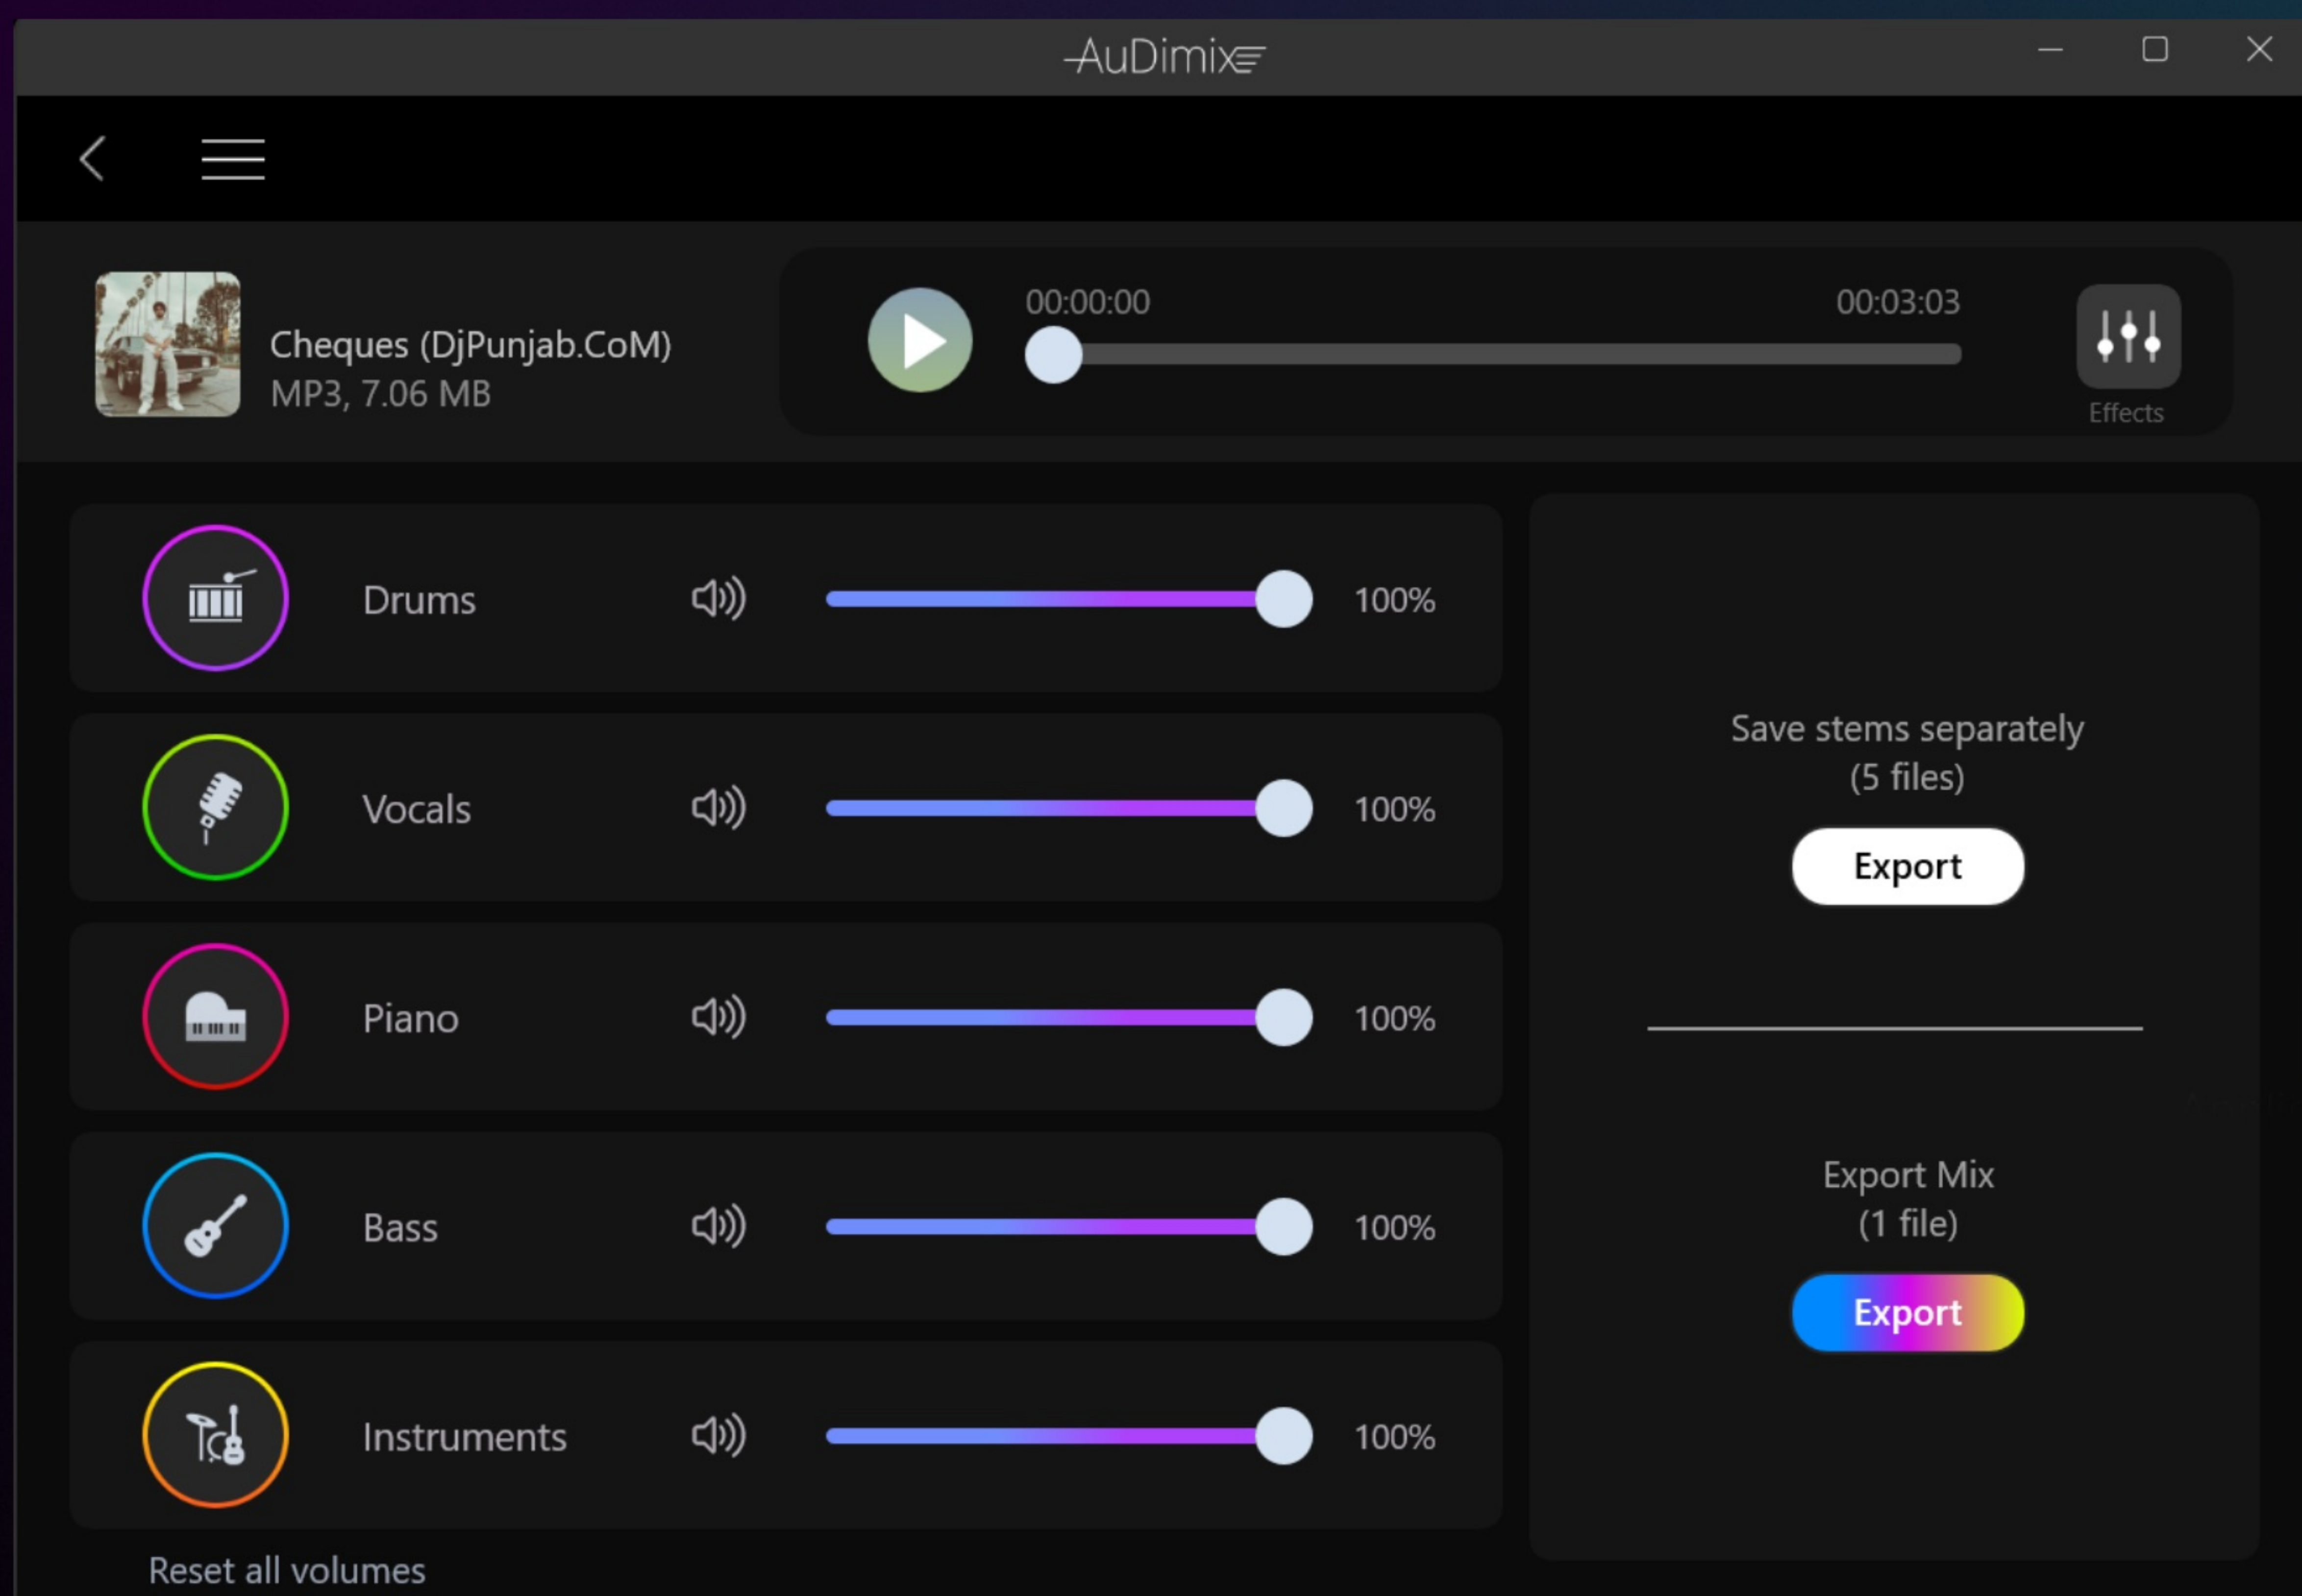

⚙ Stem Separation

AuDimix helps you separate different backing instruments and vocals of music composition. Stem separation is the process of separating Drums, Vocals, Piano, Bass and Backing Instruments into individual tracks. This technique is commonly used in music production and remixing to isolate specific elements and manipulate them independently.
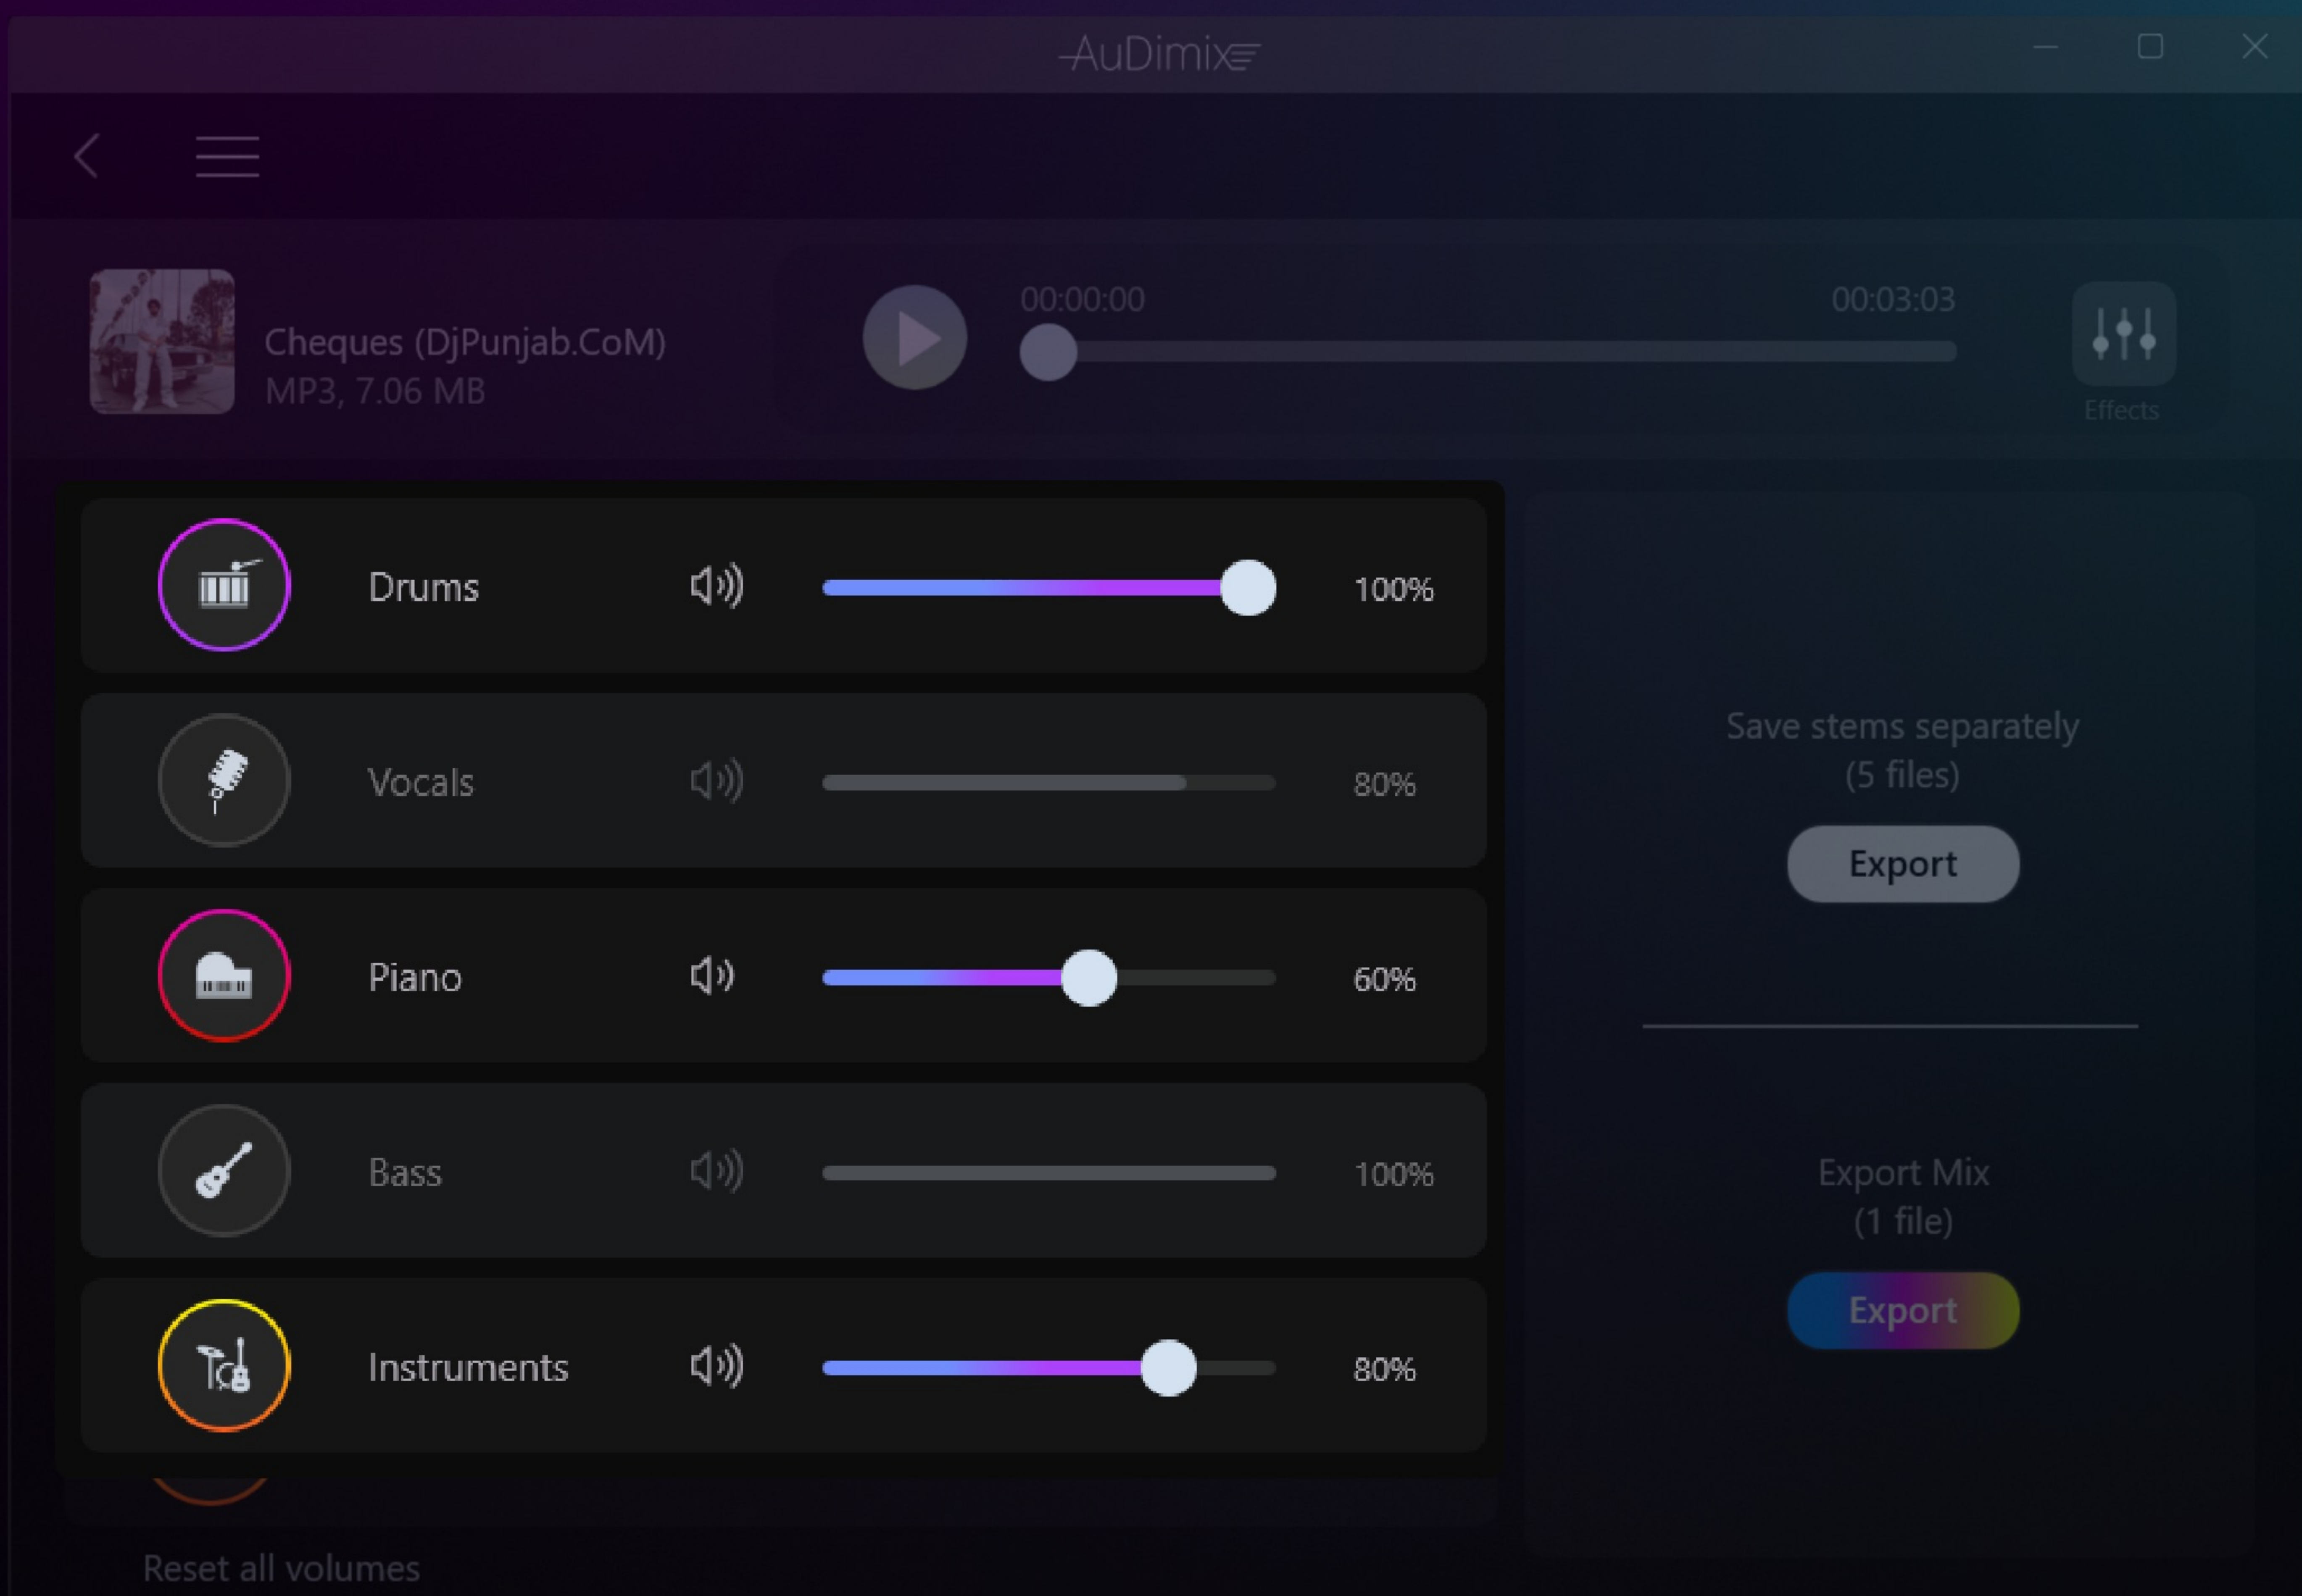

♫ Pitch

AuDimix eliminates the need for additional pitch shifting software. Make adjustments in Semitones or Cents to your tracks in seconds to practice or experiment.

Pitch	+3.91	↺ 🔵

Semitone

-4	-3	-2	-1	0	1	2	3	4

Cents

-99	0	99
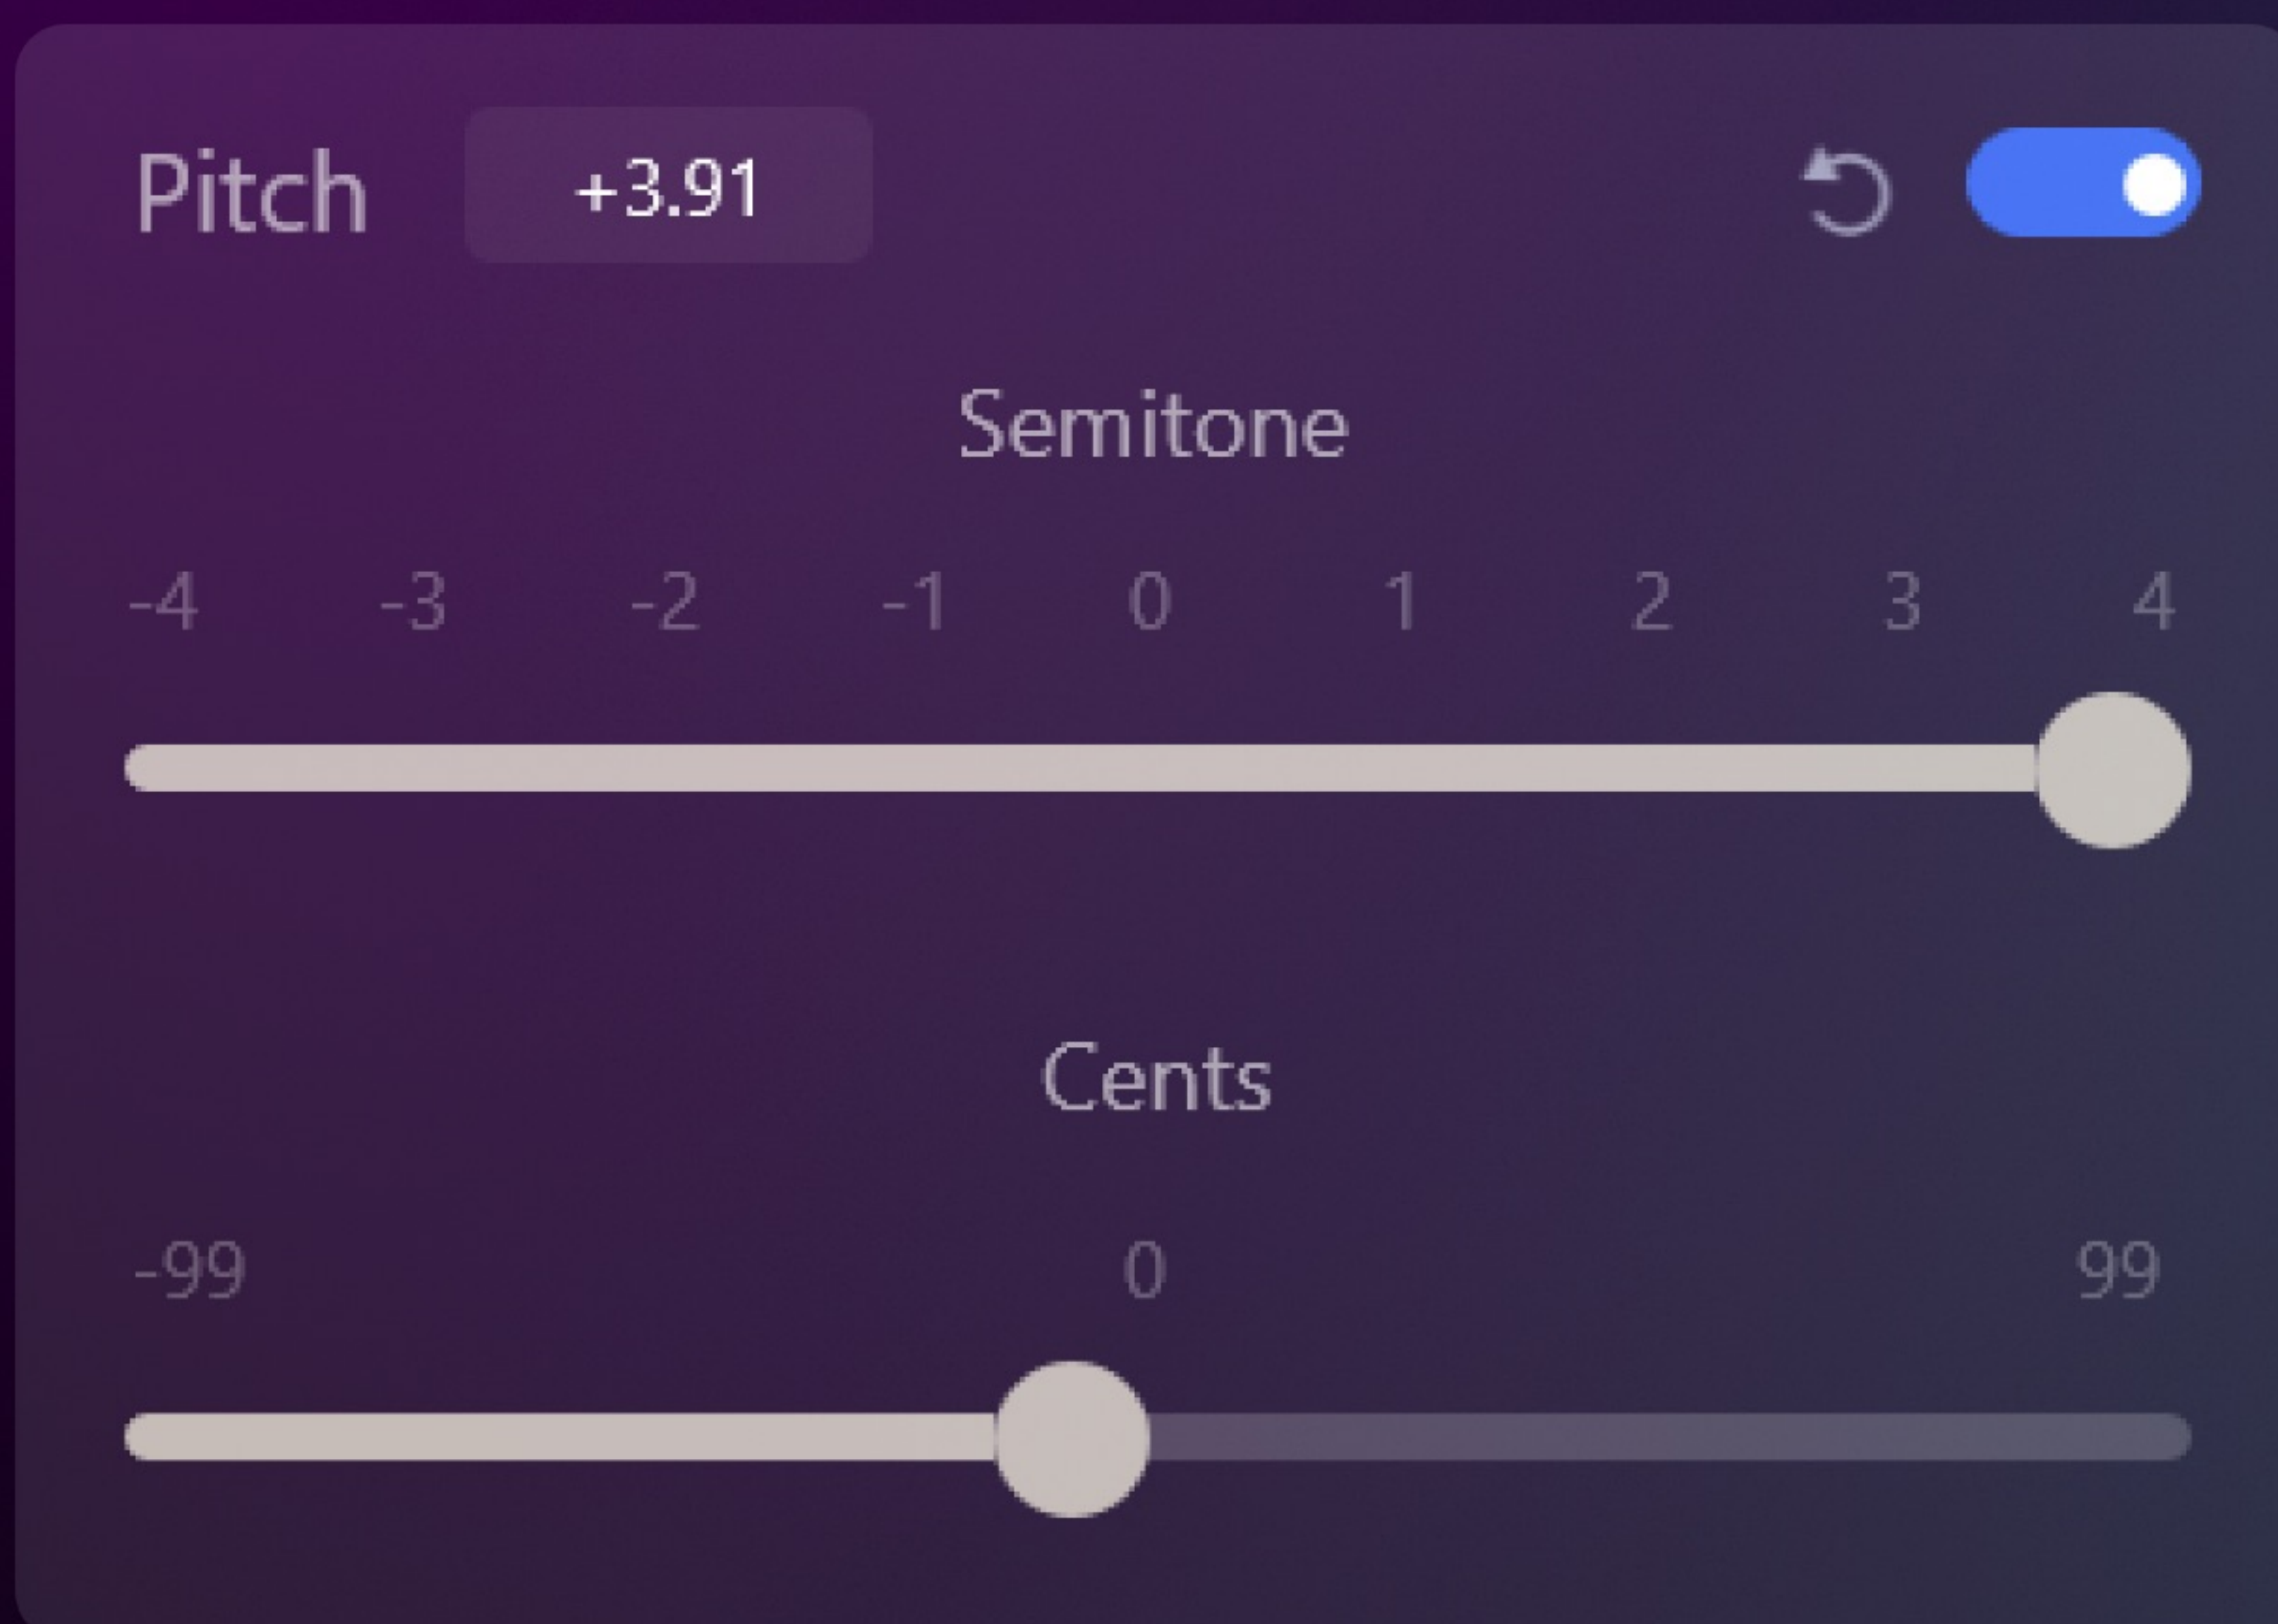

🎼 Tempo

Slow down or speed up a track using the inbuilt tempo slider. Master a challenging section, craft a mix, or simply enjoy music at your desired pace!

◉ Live Playback

AuDimix offers a live preview feature that allows you to carefully observe your audio creation. With live preview, you can hear your edits and make adjustments as needed to achieve the perfect sound. This feature provides a more efficient and precise editing experience, allowing you to fine-tune your track with ease.
