Introduction

Boom is a system-wide volume booster and equalizer that makes everything sound louder, clearer, and better for over 1 million Mac users. First released in 2011 to rave reviews and critical acclaim, Boom won *"Macworld's Best of Show 2011 Award"* while simultaneously transforming the audio coming out of user's Macs. The new Boom 2 is the second chapter in Boom's award-winning story so far.

Boom 2 is compatible with macOS 10.10.3 and higher. The latest update offers a remarkable control on the Mac Audio Output to the users. With an improved 31-Band Equalizer that supports 20 dB gain, brand new set of handcrafted Equalizer Presets, L-R Balancing, and Stereo Widening features, Boom 2 is one of a kind utility App that can make the Mac Audio sound truly perfect.

- Auto-Calibrates Itself According To The Type of Mac
- Pristine stereo sound experience that gives finer, higher precision control over all audio
- Powerful System-Wide Volume Boosting
- 31- Band Equalizer with 20 dB band Gain
- L-R Audio Balancer for Audio Precision
- Stereo Widening Feature to improve Spatial Effect
- Sample Output Rate Control
- All New Audio Effects to Enhance the Experience
- File Booster to boost system Audio Files Individually or in Batches
- Remote Companion App to Control Boom 2

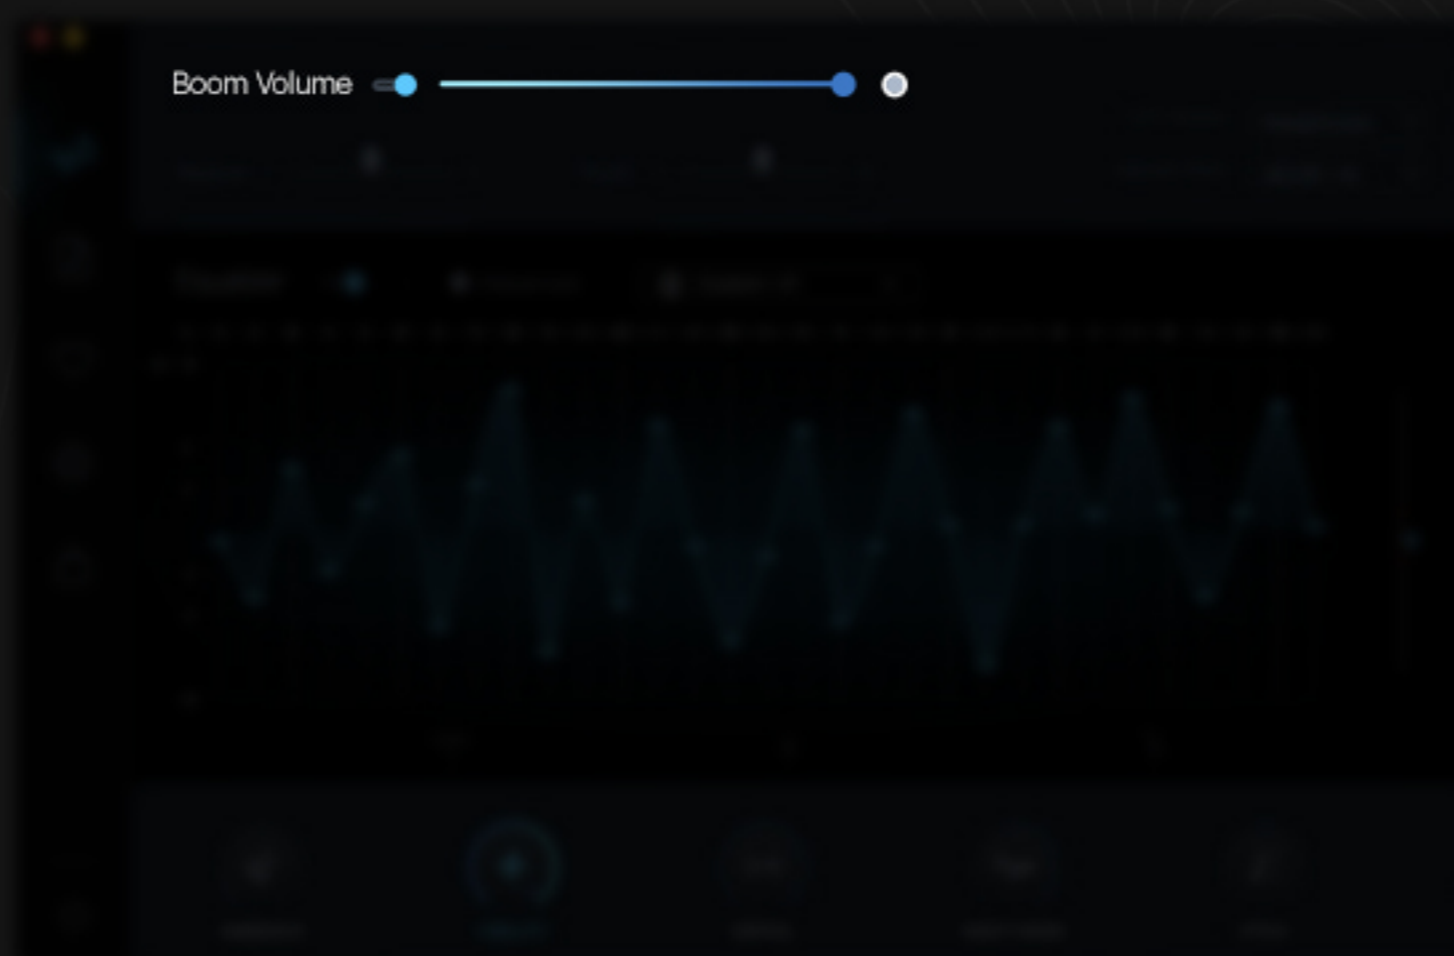

Sculpt your System Audio for the Best Stereo Sound Experience

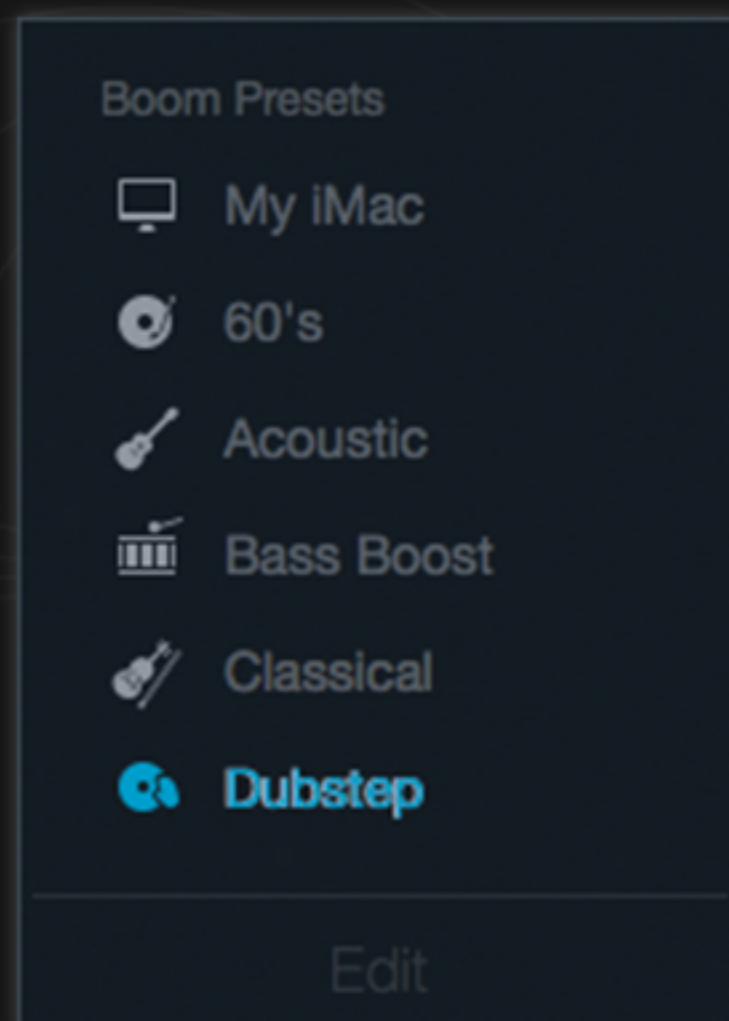

Volume Booster

Raise your system-wide volume above and beyond regular limits.

Equalizer

31-band or 10-band equalizer with a range of -20 dB to +20 dB gain adjustment.

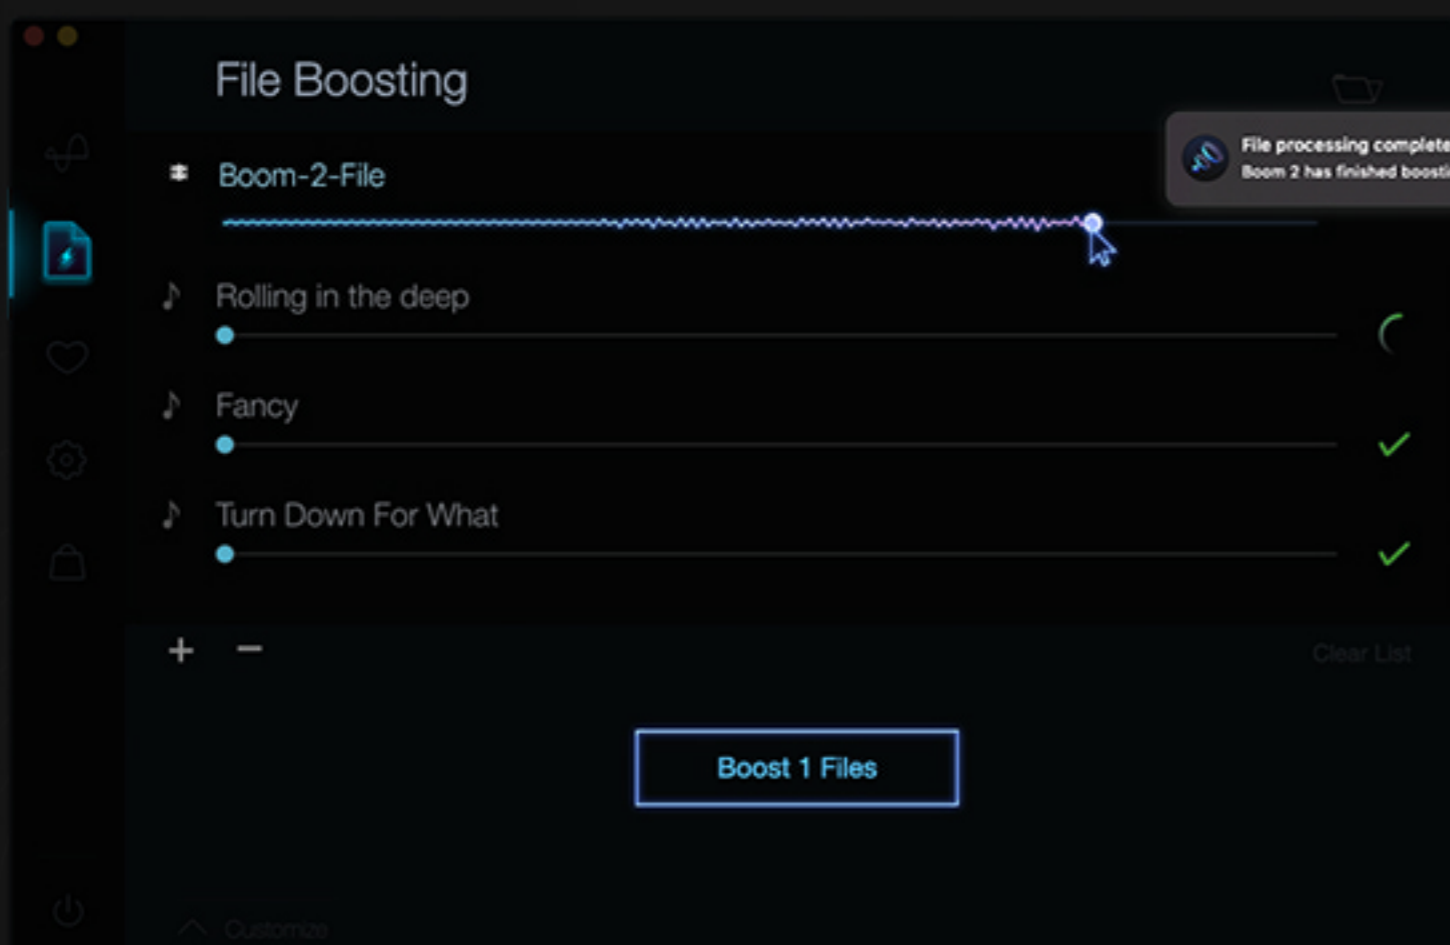

Output Sample Rate Control

Choose the right sample rate for the best possible sound.
